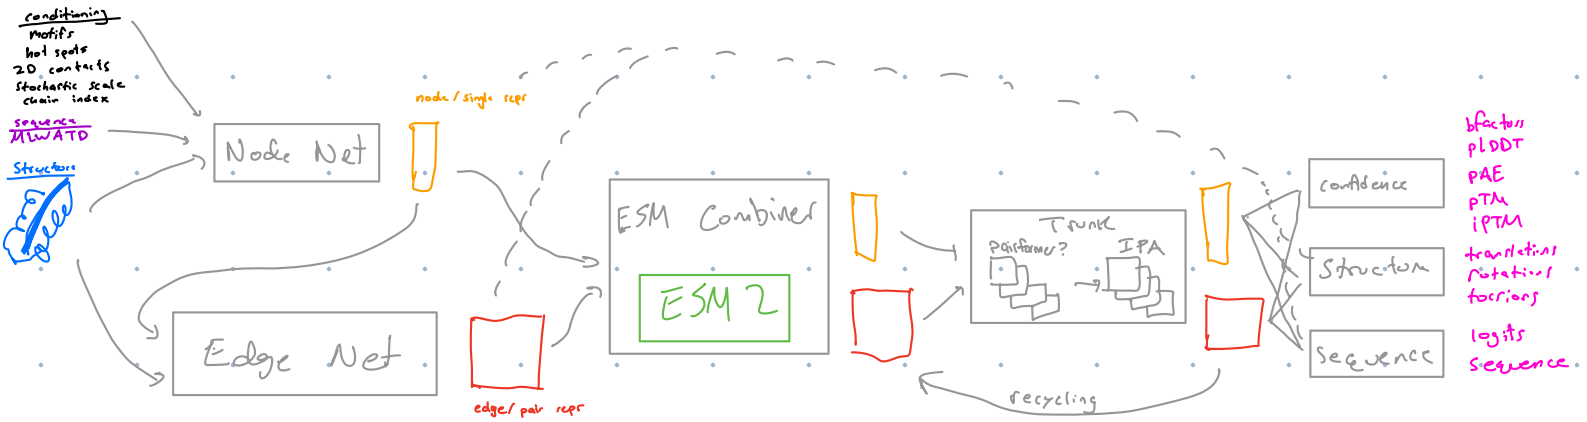
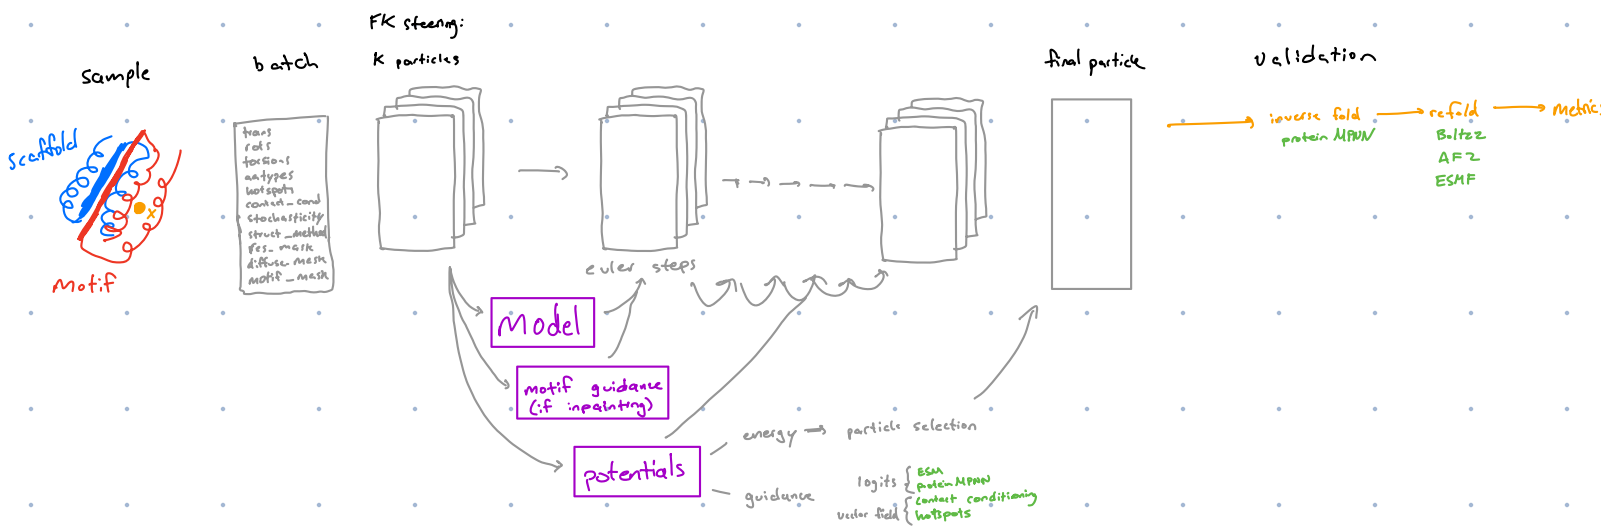
Model



Interpolant

	prior	stochastic paths	notes / optimizations	potentials
Translations	gaussian harmonic prior	✓	Minibatch OT Stochastic centering	motif guidance contact conditioning
Rotations	IFSO(3)	✓	linear / exp schedule (to settle faster)	motif guidance
Torsions	gaussian	✓	angle-space can predict 1, 3, 7 torsions	motif guidance
Sequence	uniform (random) masks	✓	Multiflow-style step probabilities uncertainty gating + mass capping noise: changes & unmasking ⇒ CTMC	ESM logits prot MPNN logits


Sampling
